AL SHEIKH

INVESTMENT GROUP

THE WEBSITE, REIMAGINED

A stronger digital *front door.*

The same company. A clearer story.
A better path from first visit to business conversation.

DESIGN · CONTENT · MOBILE · FIVE LANGUAGES

A website helps a prospect decide what to do *next.*

A referral, introduction or search can lead here. The site should help that interest become a useful conversation.

01	02	03	04
Understand	**Find a fit**	**Build confidence**	**Take action**
Who is the group? What does it do?	Which business matches my requirement?	Can I see the people, identity and real imagery?	How do I start the right conversation?
Clear group story	Seven clear divisions	Recognizable evidence	A relevant enquiry path

> The commercial aim: reduce uncertainty and make the next step easier.

This is the design rationale. Revenue and conversion effects need measurement after launch.

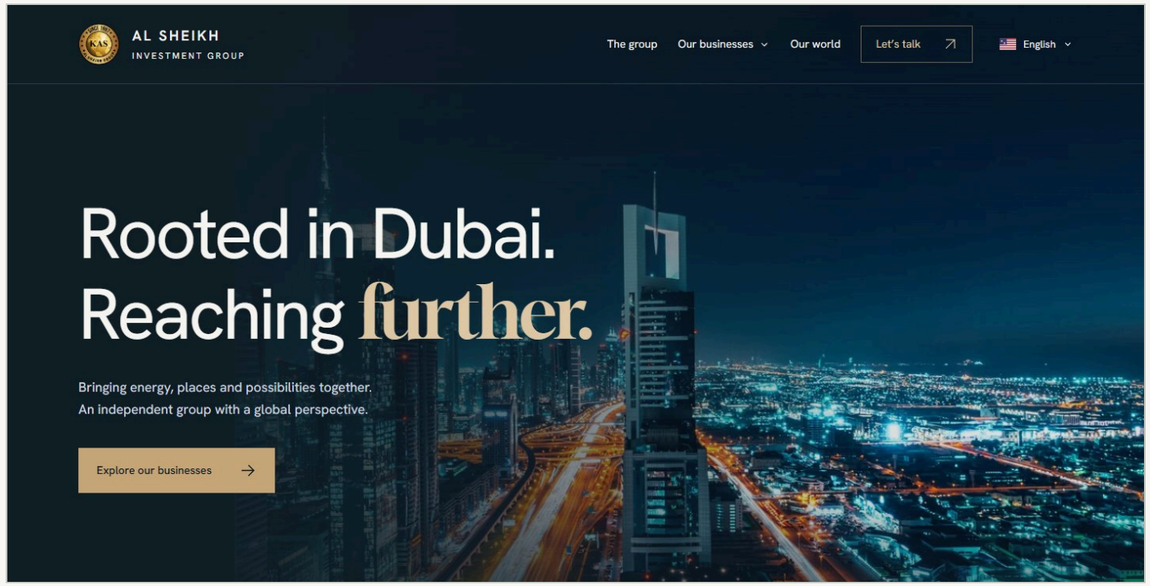

A clearer first impression, using the company's *own identity.*

ORIGINAL WEBSITE — Archived desktop capture

Large masthead and photograph; the group message starts below the image.

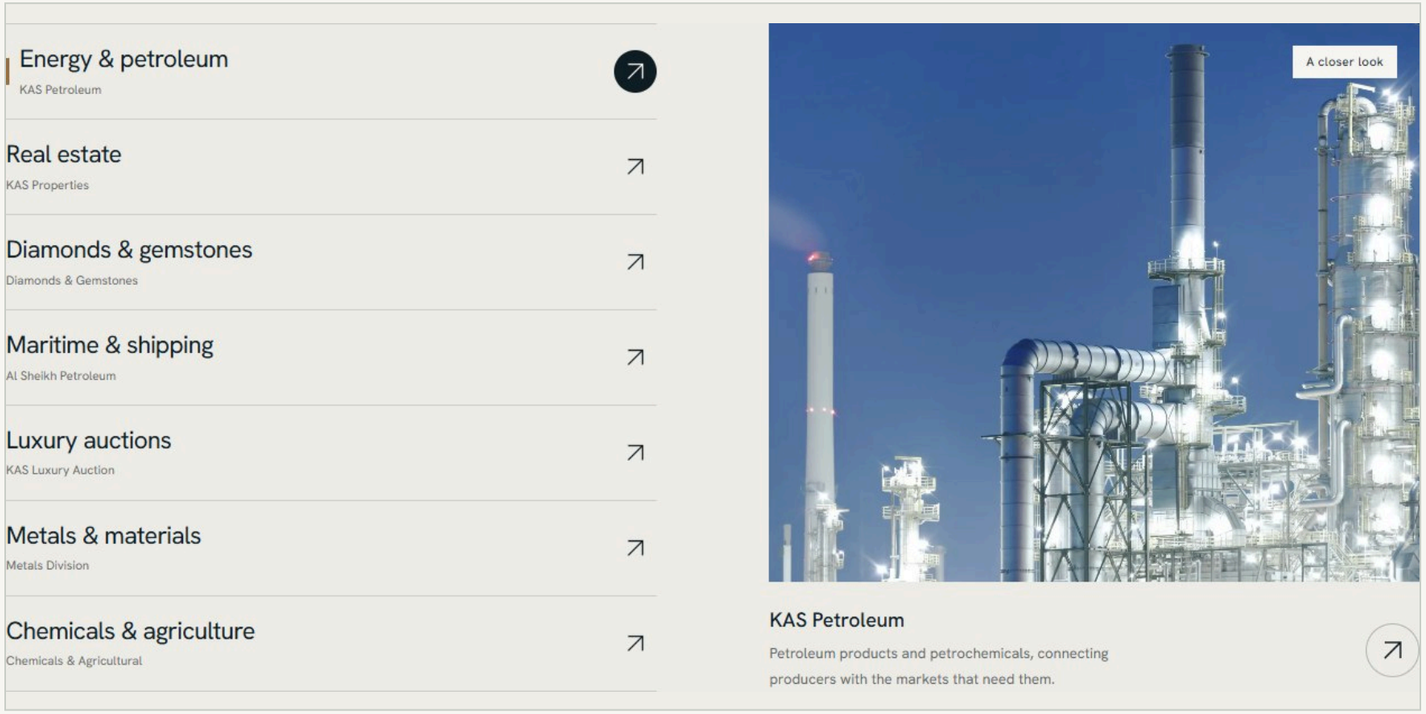

PROPOSED REDESIGN — Working desktop capture

Compact navigation, a clear introduction and a visible business action.

RETAINED: GOLD SEAL + DUBAI PHOTOGRAPH / REBUILT: HIERARCHY + TYPOGRAPHY + NAVIGATION

Seven businesses.
One understandable group.

Homepage business explorer · real company imagery · direct division links

01 / STRUCTURE

Find the right division.

A single index makes the group’s breadth easy to scan.

02 / DEPTH

Go beyond a name.

Dedicated pages organize capabilities, product focus and markets.

03 / RELEVANCE

Start with context.

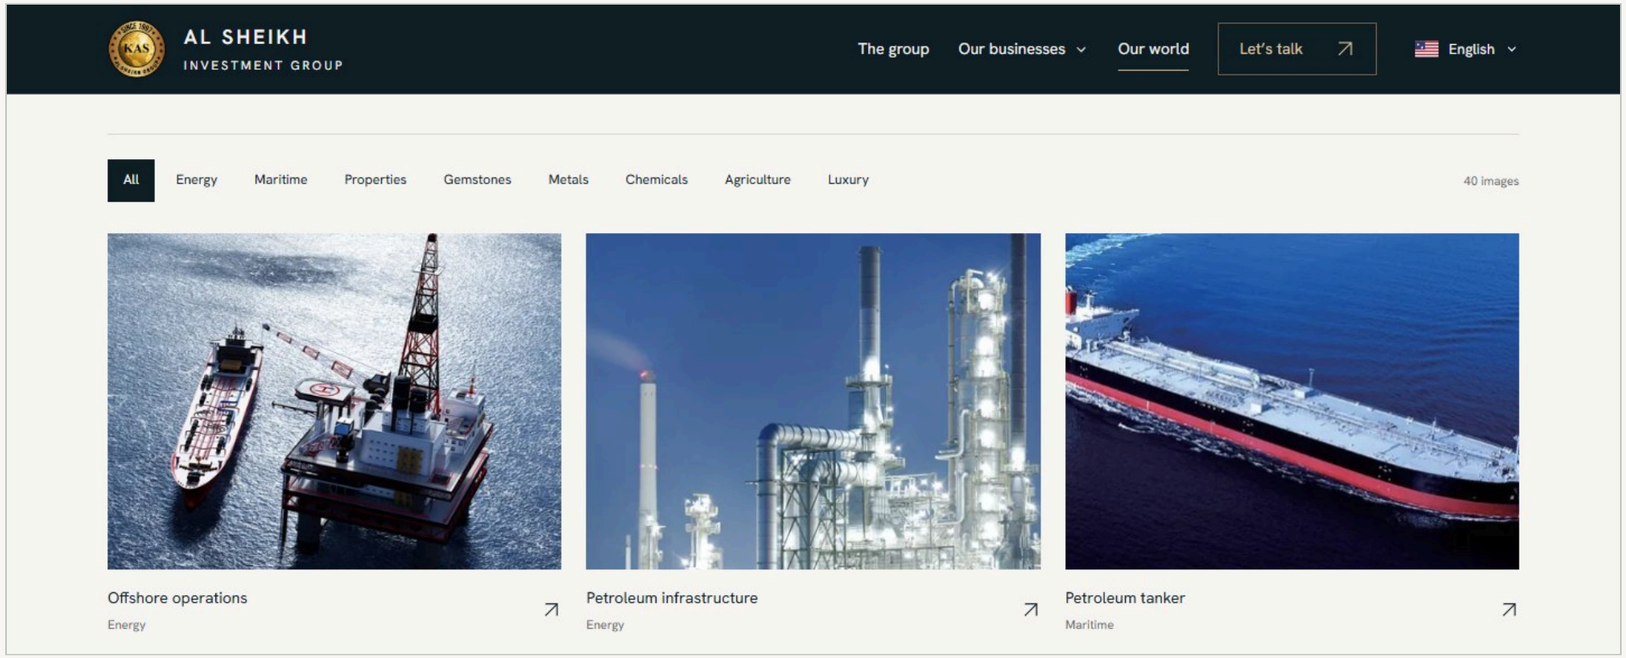

Each division leads to an enquiry with that business selected.

Real company assets. A more credible presentation.

The identity stays familiar.

The original gold seal now has a transparent background, with no square border around it.

Leadership, the company story and original photography give visitors concrete material to assess.

A filterable gallery and keyboard-operated image viewer make the original images easier to explore.

46 ORIGINAL IMAGE ASSETS ARCHIVED · OPTIMIZED DELIVERY COPIES · SOURCE PROVENANCE RETAINED

A consistent experience. Across screens. Across *languages.*

English · العربية · Français
Akan / Twi · 简体中文

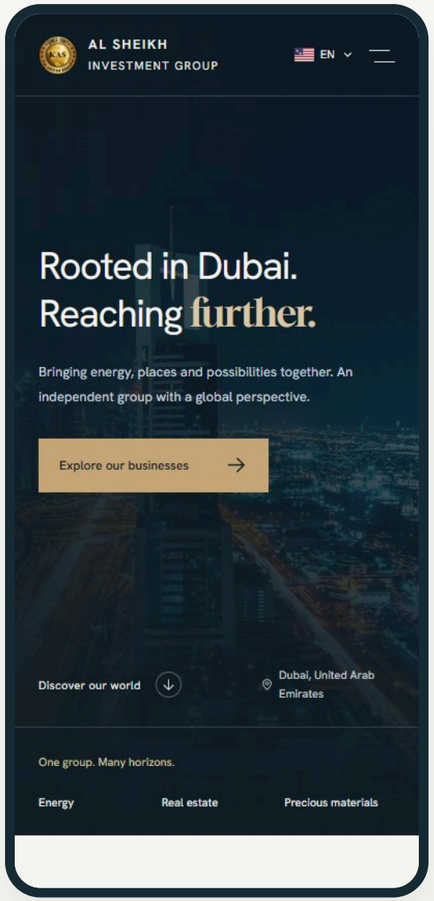

The original language offering is retained in five complete static versions.

— Arabic uses a right-to-left layout.

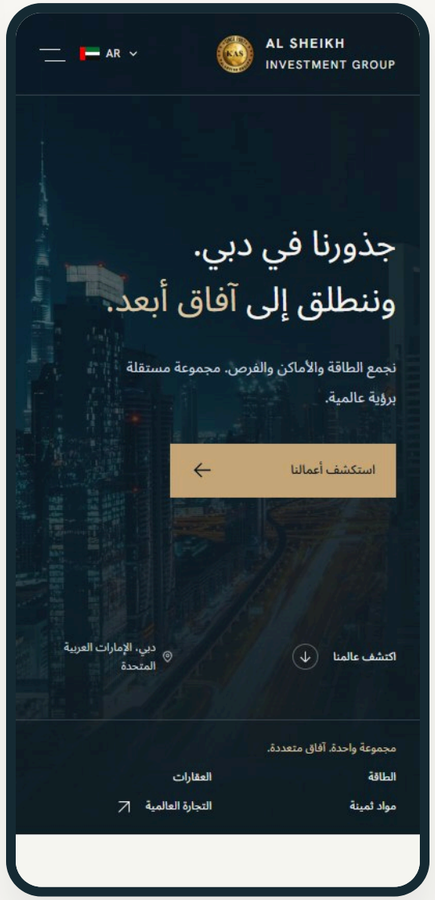

— Switching languages keeps the page and enquiry context.

— Navigation and content adapt to phone screens.

Translated copy is a draft for native review before official launch.

ENGLISH

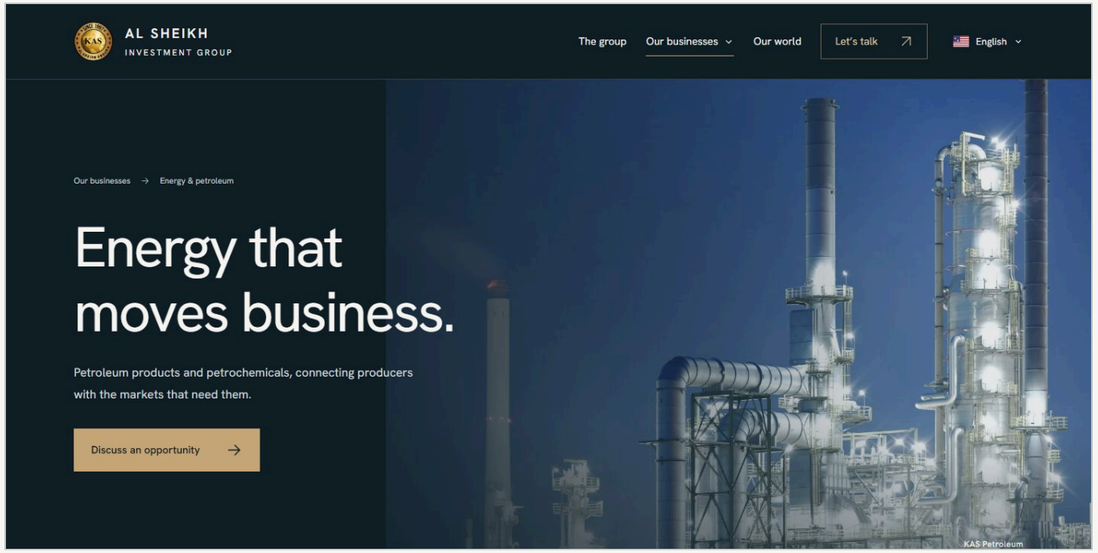

ARABIC / RTL

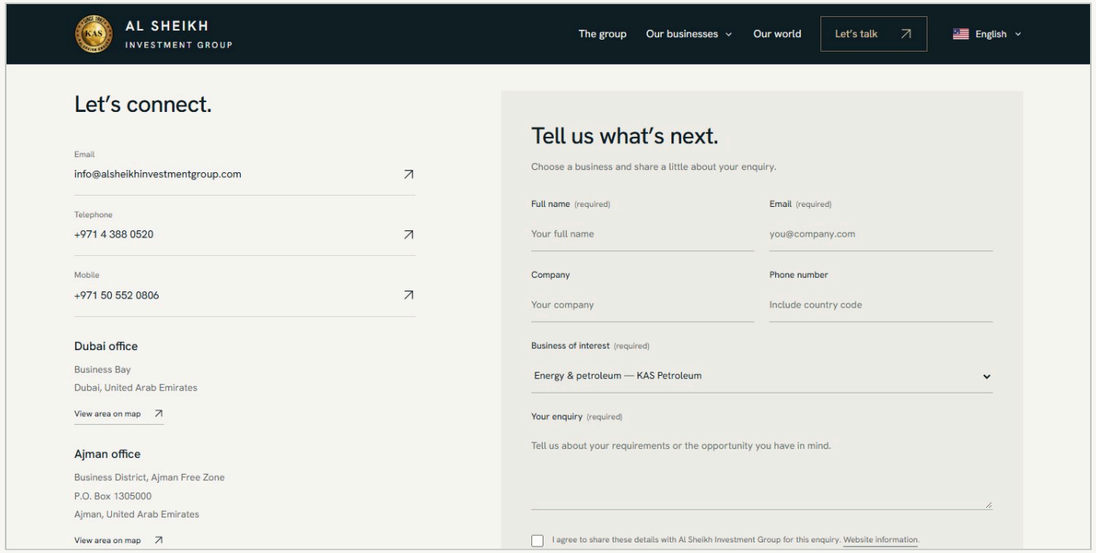

CHINESE

Give every conversation a more useful *starting point.*

1 / EXPLORE A DIVISION

Understand its focus

2 / ENQUIRE WITH CONTEXT

Business already selected

Less repetition for the visitor.

The selected business carries into the form. Required fields and a reviewable draft make the next step explicit.

CONCEPT BEHAVIOR

The form prepares an email draft to open or copy. Production email delivery is a launch task.

A working website.
With source and handover.

70

static pages

14 page types × 5 languages,
including error pages.

325

viewport checks

65 content routes checked at
five widths, from 320 to 1440px.

10

accessibility samples

Home and contact in each language;
zero automated Axe violations.

Lean delivery

Static HTML, CSS and JavaScript. Optimized images and self-hosted fonts.

Useful interactions

Business explorer, gallery filters, image viewer, mobile navigation and enquiry drafts.

Practical ownership

Complete website source, original asset archive and documented design decisions.

Automated samples are not a full accessibility certification. No measured speed, ranking or sales uplift is claimed.

The concept is ready to show. Here is what makes it *launch-ready.*

BUILT FOR THE PROPOSAL

The new experience

— New visual design and structured business content

— Responsive pages in five languages

— Gallery, navigation and enquiry draft flows

— Working private preview and complete source

01 Approve the content

Confirm company facts, image usage and native translations.

02 Connect enquiries

Agree email delivery, privacy handling and routing.

03 Configure the official launch

Connect the domain and approve search indexing settings.

04 Measure and improve

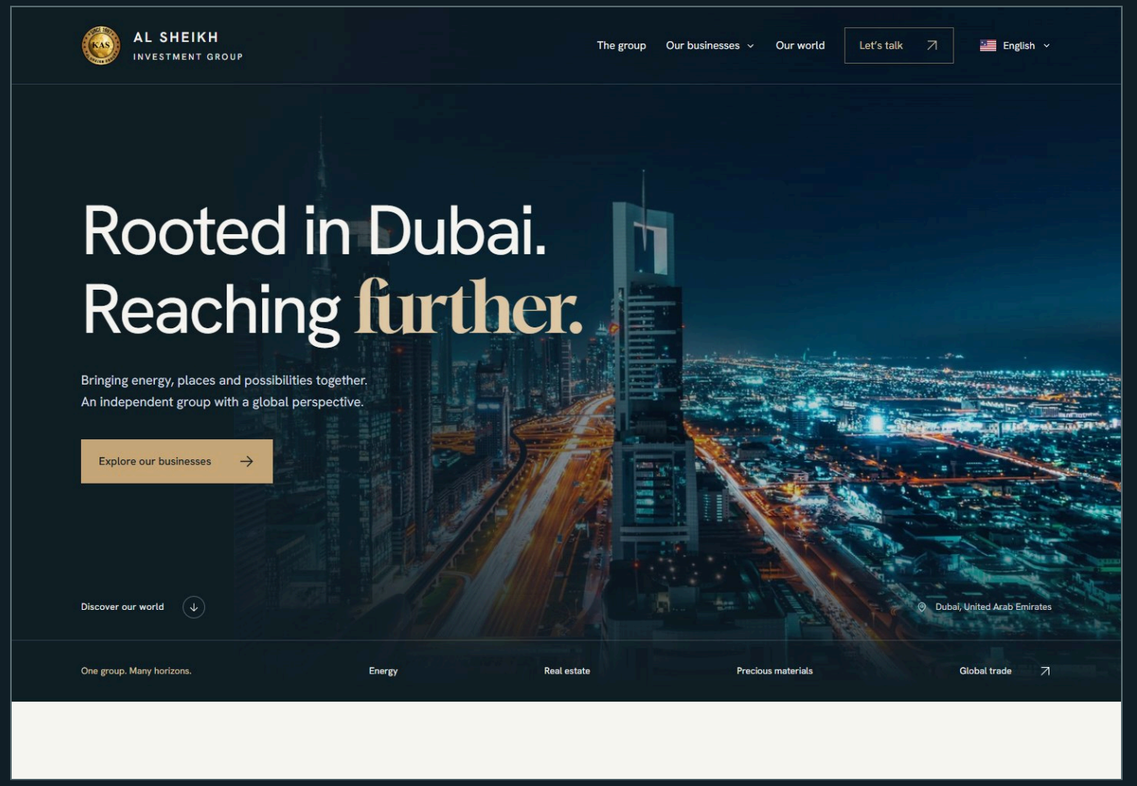

Agree analytics, success measures, maintenance and handover.

Make the scale of the group visible.

A clearer story. A stronger presentation.
An easier route to the right business.

Explore the working concept ↗

Private preview: owner access is required.
Use screen sharing for a client presentation.

THE NEXT CONVERSATION

Agree the final scope, content approval, enquiry integration and launch plan.
